MOHAMMED JASIM

IT Support & AI Professional

Ajman, UAE | 0567665827 | jasimala07@gmail.com

PROFESSIONAL SUMMARY

IT Support and AI professional with hands-on experience in helpdesk operations, incident resolution, and AI-driven tools. Skilled in delivering fast, reliable technical support while applying automation and generative AI to improve efficiency. Strong foundation in cybersecurity, programming, and system administration, backed by an MSc in Cybersecurity and a BSc in Computer Science.

CORE COMPETENCIES

AI & Generative AI

GenAI Tools (Claude, ChatGPT, Google Gemini)
Prompt Engineering
Agentic AI Workflows
AI Chatbot Development
LLM Integration
AI-Powered Data Analytics
No-Code Predictive Modeling
AI-Driven Automation
Intelligent Process Automation
Dialogflow
RAG Systems
n8n Workflow Automation

Programming & Web Development

Python
Java
JavaScript
Node.js
PHP
HTML
CSS
SQL
MySQL
Web Development
React.js
Next.js
API Integration
REST APIs
Git
Shopify
E-Commerce Development

Cybersecurity & IT

Cybersecurity Analysis
Incident Response
Security Threat Detection
System Troubleshooting
IT Support
Help Desk Management

Tools & Platforms

Windows
Linux

Git
Dialogflow
MySQL
Forage
GenAI Platforms

IT Support & Help Desk

Ticket Management (ServiceNow, JIRA)
Hardware & Software Support
Remote Assistance
User Onboarding
First-Call Resolution
SLA Management
System Administration
Desktop Support
Email & Collaboration Tools

PROFESSIONAL EXPERIENCE

IT Support Engineer – Facility Management Helpdesk | Al Mariah Facility Management, SKMC Ajman

Ajman, UAE | April 2025 – Present

- Delivered phone, email, and in-person technical support achieving a 95% first-call resolution rate
- Logged, prioritized, and escalated helpdesk tickets in line with SLA requirements
- Recorded and analyzed incident and downtime data to identify recurring issues
- Generated performance reports tracking efficiency trends and response times

IT Support | Al Taqwa Electric Wire Trading

Ajman, UAE | 2023 – 2025

- Provided hardware and software technical support across the organization
- Documented issues and resolutions to build a shared knowledge base
- Collaborated with the team to maintain operational reliability

EDUCATION

MSc in Cybersecurity

University of West London

BSc in Computer Science

University of West London | 2021 – 2024

AI & INNOVATION PROJECTS

DocuChat – RAG Chat with PDFs | docuchat-jasim.vercel.app

- Built a retrieval-augmented (RAG) chatbot with Next.js, TypeScript, and the Gemini API that answers questions from uploaded PDFs with page-level citations
- Implemented BM25 search with page-aware chunking and citation checks so every answer stays grounded in the document

BillScan – Receipt to Structured Data | billscan-jasim.vercel.app

- Converts bill and receipt photos into clean tables using Gemini structured output with a JSON schema and Zod validation
- Added automatic total, tax, and VAT consistency checks with one-click CSV export

TripAgent – AI Travel Planning Agent | tripagent-jasim.vercel.app

- Built an AI agent using function calling across 10 tools to plan trips within budget, with a live step-by-step trace
- Designed stop rules (step limit, time limit, loop detection) so the agent knows when to stop and explains why

EvalLab – LLM Evaluation Dashboard | evallab-jasim.vercel.app

- Built an eval suite testing retrieval, guardrails, RAG answers, and data extraction across my AI apps: 129/137 checks passed
- Scorecard dashboard with run history that exposed real weaknesses and drove fixes, including a VAT calculation bug

AI Chatbot for Website

- Built with Dialogflow and Node.js for 24/7 customer support with real-time API integrations
- Increased customer engagement by 40%

Web-Based Task Management System

- Full-stack build using HTML, CSS, and JavaScript with secure authentication and real-time tracking
- Improved interaction efficiency by 30%

E-Commerce Platform

- Developed with HTML, CSS, JavaScript, and PHP including cart and order processing
- Improved transaction efficiency by 25% with payment and inventory integration

CERTIFICATIONS & AI SIMULATIONS

- Tata Group – AI-Powered Data Analytics Simulation (Forage): EDA with GenAI tools, no-code predictive modeling for delinquency risk, AI-driven collections strategy with ethical AI compliance
- Deloitte – Cybersecurity & Incident Response Simulation (Forage): web activity log analysis, breach impact assessment, suspicious activity investigation
